- **Manufacture Alpine Dieppe Jean Rédélé has produced its 20,000th new-generation Alpine A110 since its launch on 1 December 2017.**
- **It's an "A110 R Le Mans" model.**
- **The new-generation A110 is the most produced Alpine in brand history.**

Manufacture Alpine Dieppe Jean Rédélé has produced its 20,000th new-generation Alpine A110 since its launch on 1 December 2017.

It is an A110 R Le Mans, a limited series of 100 examples to celebrate the 100th anniversary of the legendary 24 Hours of Le Mans endurance race.

The A110 is by far the most widely produced Alpine in the brand's history, with almost three times the number of A110 Berlinettes produced (7,176 vehicles produced between 1961 and 1977) or close to twice the number of A310s (11,616 vehicles produced between 1971 and 1984), which previously held this 'title'.

Collaborators gathered to immortalise this milestone for the Manufacture.

*"For nearly 60 years, the men and women of Dieppe have been shaping the legend and heritage of Alpine,"* said **Anne-Catherine Basset**, Alpine Industrial Director & Director of the Manufacture Alpine Dieppe Jean Rédélé.
